How to install « Layout – Group By»?

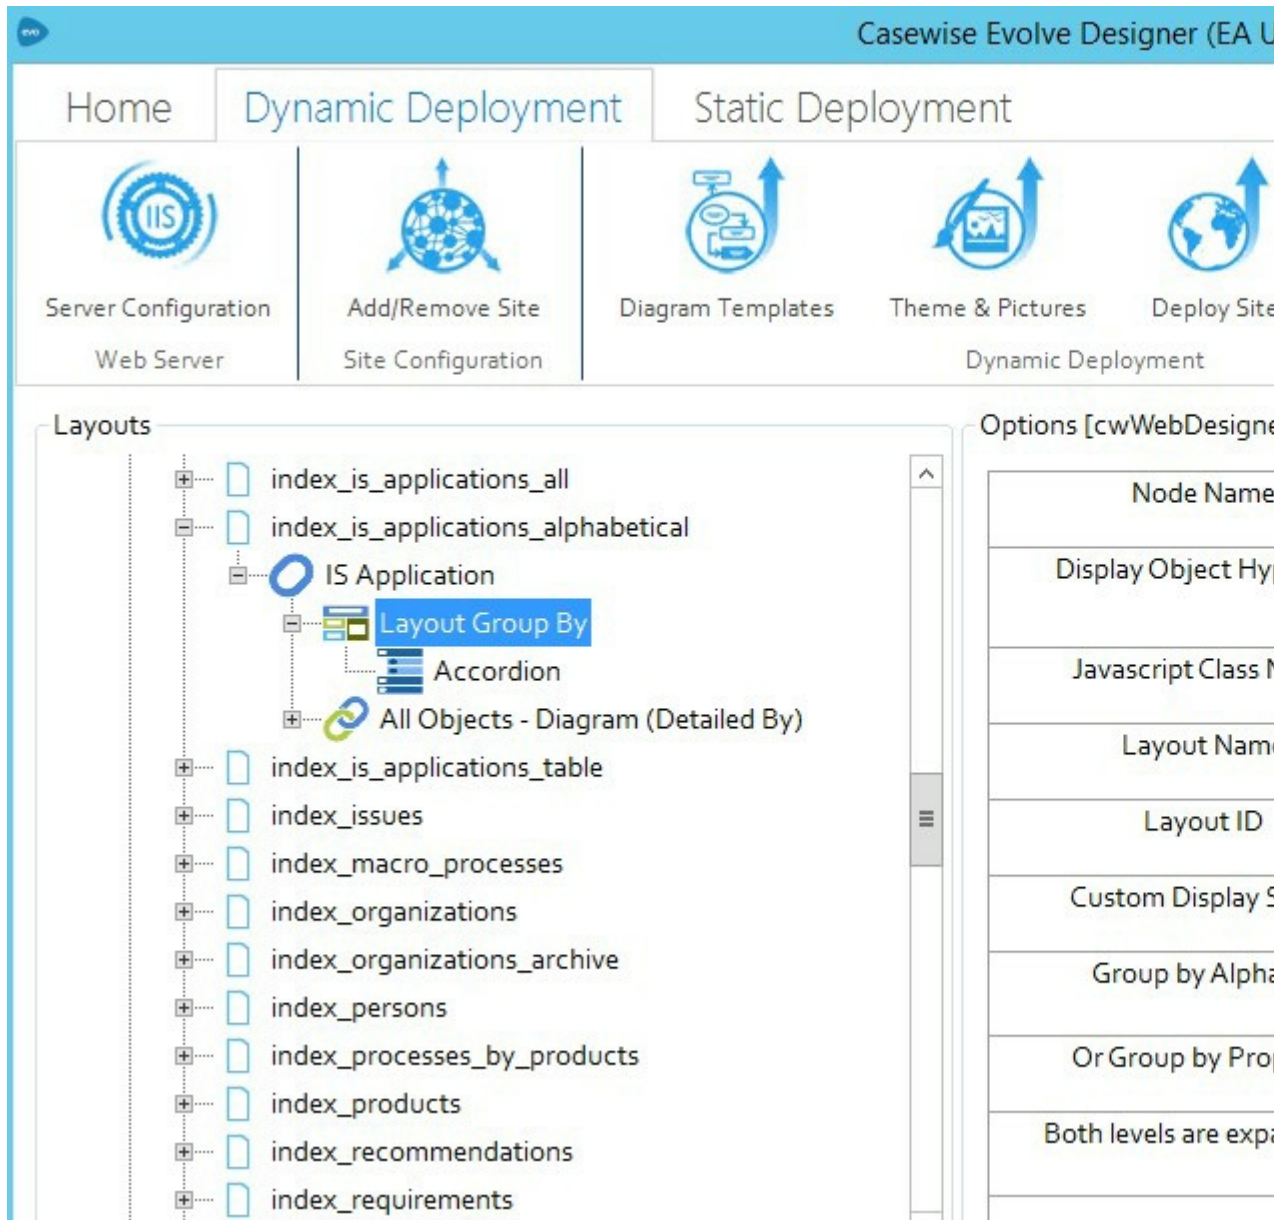

<https://github.com/casewise/cpm/wiki>
then Restart Evolve Designer

How to configure "Layout – Group By"

Configuration in Evolve Designer

In an index page – Group by alphabet**

- Add an index page
- Switch to **Layout Group By**
- If you wish to apply the "Accordion" to the top level, you need first to add "Accordion" behavior and then Switch the layout to **Layout Group By**
- Tick the option "Group By Alphabet"

In an index page – Group by Property**

- Add an index page
- Switch to **Layout Group By**
- If you wish to apply the "Accordion" to the top level, you need first to add "Accordion" behavior and then Switch the layout to **Layout Group By**
- Keep the option "Group By Alphabet" unchecked
- Specify the **Property Type Script Name** in "Or Group By Property"

- Make sure that the property is selected in "Selected Properties", it will make the property data available in JSON data.
- The fact of using "Layout Group By", it wills the items organized in 2 levels. If you wish to make both of them expandable, check the option "**Both levels are expandable**"

The screenshot displays a software interface with a hierarchical tree view on the left and a properties panel on the right.

Tree View Structure:

- Technical Service Group
 - Layout Group By
 - Accordion
 - Technical Service Group - Technical Service
 - Layout List (Simple)
